

Force Sensor KL500 100kN

Item number: 5501

Tension load cells are ideal force sensors to measure large loads. Therefore, these are mainly used in cranes and other rope-operated lifting systems for measuring the tensile force. The load tabs have been specifically designed for use in harsh environmental conditions.

Applications:

-

Monitoring of rope forces

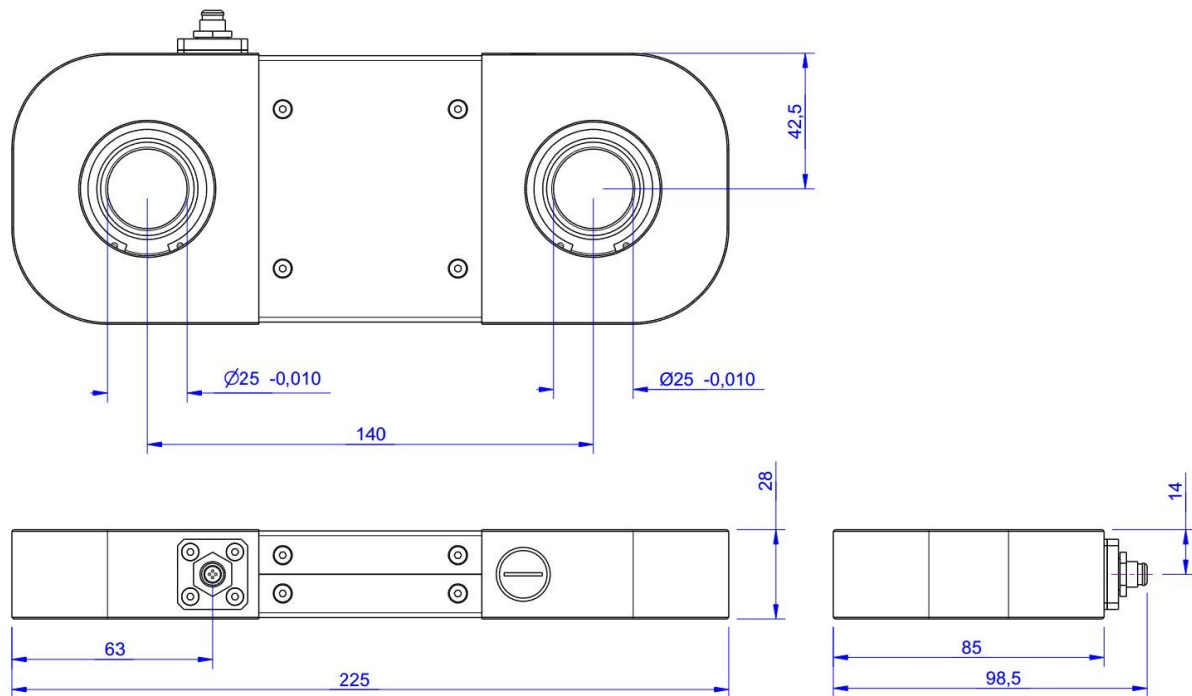

-

Calibration of force-measuring devices

Optional special version

- Protection class IP68: from rated force 200 N
- Pressure range up to 8 bar
- with integrated electronics 0 ... 10V, 4 ... 20mA
