

## KD191 50kg, 100kg, 200kg, 500kg, 1000kg

### Description

The force sensor KD 191 is used in weighing platforms and in test beds. It allows the installation of a platform sized 900 x 900mm (or 600mm x 600mm for the load range 1000kg) for force introduction.

The solid construction allows force transmission over a large surface and incorporates lateral forces and torque without any significant loss of accuracy. The measurement error resulting from an eccentric load of 25% of the nominal load is less than 0.01% of the reference input. This force sensor is ideal for use in industrial test beds and sports medicine.

The force sensor KD 191 conforms to the stringent European requirements for use in trade approved scales. Thanks to a double epoxy resin cover, this force sensor is also able to withstand high humidity. It fulfills the 12-day moisture test according to IEC 68-2-30.
