

## KM10z 25N, 50N, 100N, 200N

### Description

The KM10z membrane force sensor is ultra-miniature sensor for force and pressure measurement. The force is applied on two M2.5 thread. In the application of force is necessary to ensure that no bending moments greater than 0.1 Nm be initiated.

## Mounting

Installation instructions: When assembling attachment parts, hold the sensor in place on the installation side / do not guide any tensioning torque through the sensor. Attachment parts may be supported on adjustable feet on the end faces, if preferred

Note: We recommend that the sensor KM10z with rated load 500N to use only for pressure measurements! Thread the sensor only suitable for sensor mounting, not suitable for tension!

## Installation

Gap "A" may not be closed, is necessary for the function of the force sensor.
