

KR20 5kN, 10kN, 20kN, 30kN, 40kN, 50kN, 60kN, 100kN, 200kN

Description

The force measurement ring KR20 was developed especially for examining preload forces on screws.

Because of its very low construction height, the sensor is equipped with a Teflon cable with an outer diameter of just 1.8mm.

The force measurement ring is equipped with a strain gauge that covers the entire area. A high level of repeatability is thus achieved in various installation positions. The force measurement ring has a Sub-D-15 plug connection containing internal trimming resistors.

The force measurement ring is supplied with a detailed factory certificate (5 points, 3 measurement series in 3 installation positions).
